

How to get connections in Corepoint Test to connect to Cerner test domain com servers:

- (1) Open the Test01 Integration Engine Monitor
- (2) Scroll down to Charge Interfaces
- (3) Open the CorePoint\_Cerner\_Production\_Connections sheet
- (4) In Test01, identify which interfaces you need to refresh to connect.
- (5) In the CorePoint\_Cerner\_Production\_Connections sheet, find the name of the Cerner com server that corresponds to the interface.
- (6) In OpenView, find the com server, stop it and then start it.
- (7) Wait to see if the interface connects in the Engine Monitor. It should change from yellow to green.
